ESSAY PAGE 1

ESSAY PAGE 1

Should students be allowed to take a break from school between high school and college?

**Avoid asking questions in essays this short, especially in the introduction and conclusion.**

My answer to that question is no. Different factors can play on the body and mind during these breaks. With two stories I can prove those factors. Students shouldn't take a break between high school and college.

Students who take these breaks will say to themselves, "It's just a small break until I am ready for college." Before you know it the chance to go to college will have passed you by. My mother's friend decided to take a break from school. She would tell herself, "I don't have enough money," or, "What about my dog." She ended up not going to college. Right now she's doing okay, but she could have been better off.

**These examples have the potential to be helpful, but you need to analyze them more to prove how they are representative of most cases.**

The students who take these breaks are a trap which can make life harder end up going to college. They have a successful career and a happy life. My father was one of those who went to college immediately. Now he is right where he wants to be, living a good, healthy life of prosperity.

Students shouldn't take a break between high school and college. Those that do will end up hurting themselves.

**To avoid having length negatively impact your scores, try to write at least a page and a half each time.**
